EDUCATION

- Anurag University** Hyderabad, India
B.Tech in Computer Science; CGPA: 9.05/10 Aug 2023 – May 2027 (Expected)

EXPERIENCE

- Walmart Global Tech** Remote
Software Engineering Intern (Virtual) Summer 2024
 - Route Optimization:** Developed Python-based pathfinding algorithms to optimize last-mile delivery, reducing failed order rates by identifying high-risk delivery bottlenecks.
 - Data Analytics:** Processed large-scale customer datasets to streamline logistics pipelines, contributing to improved delivery efficiency across virtual simulation environments.
- J.P. Morgan Chase & Co.** Remote
Software Engineering Intern (Virtual) 2024
 - Full-Stack Development:** Architected a responsive trader-task interface using REST APIs and internal frameworks to centralize and automate internal workflows.
 - Data Visualization:** Integrated live stock price streaming with interactive dashboards, enabling real-time financial monitoring for simulated trading environments.

PROJECTS

- Aegis AI | [Live Demo](#)** Full-Stack SOC Dashboard
MERN Stack, Socket.io, JWT, Recharts Feb 2026
 - Threat Visualization:** Built a real-time Security Operations Center dashboard to monitor network vulnerabilities, utilizing WebSockets for low-latency system health updates.
 - Secure Architecture:** Implemented JWT-based authentication and secure API communication to maintain data integrity for sensitive security logs.
- ProsperOS | [Live Demo](#)** AI-Powered Financial System
React, Ollama (Llama 3), Recharts, Tailwind Feb 2026
 - Privacy-First AI:** Integrated Local LLMs via Ollama to provide offline, secure investment strategies without exposing sensitive financial data to external APIs.
 - Financial Analytics:** Engineered complex logic for Net Worth tracking and DTI analysis, including a "What-If" engine to simulate 10-year opportunity costs.
- SR Sports | [Live Demo](#)** Headless E-Commerce Platform
Next.js, Sanity CMS, Tailwind CSS, Vercel Jan 2026
 - Production Deployment:** Launched a full-scale commerce site for a cricket business, managing real-world inventory and content through a headless Sanity CMS[cite: 40, 43].
 - Performance Optimization:** Achieved 95+ Lighthouse scores by optimizing Core Web Vitals, image delivery, and server-side rendering for a seamless user experience.

ACHIEVEMENTS

- Amazon ML Challenge 2025:** Ranked **1050 / 82,794** (Top 1.3%) for machine learning model accuracy.
- Competitive Programming:** Solved **1,160+** problems across CodeChef and LeetCode[cite: 47].
- Suntek DSA Elite 25:** Selected as a **Top 25 student** out of peer group for excellence in Data Structures and Algorithms.
- Google Maps Nominee:** Shortlisted as an official nominee for the Google Maps Platform Challenge for "Urban Ally".

SKILLS

- Languages:** C++, Python, JavaScript, Java, SQL, HTML5, CSS3
- Frameworks/Web:** React.js, Next.js, Node.js, Express.js, FastAPI, MERN Stack, Tailwind CSS
- Cloud & Database:** AWS (Cloud Foundations), MongoDB, Firebase, Sanity CMS
- Tools & AI:** GitHub, Groq (LPU Inference), REST Client (Postman), Ollama, Vercel, OpenCV
