

SUNIL RAVULAPATI

Full-Stack Developer | Top 1.3% Amazon ML Challenge | AI & Cloud Enthusiast

☎ +919550145568 ✉ sunilravulapati028@gmail.com 💻 sunil-ravulapati 🌐 sunilravulapati 🌐 Website 📍 Hyderabad, India

SKILLS

Programming Languages :	C++, Python, JavaScript, Java, SQL, HTML5, CSS3, C
Frameworks & Libraries :	React.js, Next.js, Node.js, Express.js, FastAPI, MERN Stack, Tailwind CSS, React, Flask, Express
Tools & Platforms :	GitHub, Groq (LPU Inference), REST Client (Postman), Ollama, Vercel, OpenCV, Git, Docker
Databases :	AWS (Cloud Foundations), MongoDB, Firebase, Sanity CMS, MySQL
Soft Skills :	Communication, Problem Solving, Teamwork, Time Management, Adaptability, Critical Thinking, Creativity
Languages :	English, Hindi

PROJECTS

Aegis AI  Vercel	Feb 2026
<i>Full-Stack Developer</i>	
- Threat Visualization: Built a real-time Security Operations Center dashboard to monitor network vulnerabilities, utilizing WebSockets for low-latency system health updates. - Secure Architecture: Implemented JWT-based authentication and secure API communication to maintain data integrity for sensitive security logs.	
<i>Technologies / Tools Used : MERN Stack, Socket.io, JWT, Recharts</i>	
ProsperOS  Vercel	Feb 2026
<i>Full-Stack Developer</i>	
- Privacy-First AI: Integrated Local LLMs via Ollama to provide offline, secure investment strategies without exposing sensitive financial data to external APIs. - Financial Analytics: Engineered complex logic for Net Worth tracking and DTI analysis, including a "What-If" engine to simulate 10-year opportunity costs.	
<i>Technologies / Tools Used : React, Ollama (Llama 3), Recharts, Tailwind</i>	
SR Sports  Vercel	Jan 2026
<i>Full-Stack Developer</i>	
- Production Deployment: Launched a full-scale commerce site for a cricket business, managing real-world inventory and content through a headless Sanity CMS. - Performance Optimization: Achieved 95+ Lighthouse scores by optimizing Core Web Vitals, image delivery, and server-side rendering for a seamless user experience.	
<i>Technologies / Tools Used : Next.js, Sanity CMS, Tailwind CSS, Vercel</i>	

WORK EXPERIENCES

Software Engineering Intern (Virtual, Forage) Internship	Nov 2024 - Nov 2024
<i>Walmart Global Tech</i>	
<i>Remote</i>	
- Route Optimization: Developed Python-based pathfinding algorithms to optimize last-mile delivery, reducing failed order rates by identifying high-risk delivery bottlenecks. - Data Analytics: Processed large-scale customer datasets to streamline logistics pipelines, contributing to improved delivery efficiency across virtual simulation environments.	
<i>Technologies / Skills Used : Python, Data Structures, Algorithms, Data Analytics</i>	
Software Engineering Intern (Virtual, Forage) Internship	Sep 2024 - Sep 2024
<i>J.P. Morgan Chase & Co.</i>	
<i>Remote</i>	
- Full-Stack Development: Architected a responsive trader-task interface using REST APIs and internal frameworks to centralize and automate internal workflows. - Data Visualization: Integrated live stock price streaming with interactive dashboards, enabling real-time financial monitoring for simulated trading environments.	
<i>Technologies / Skills Used : Kafka, Java, Data Structures</i>	

EDUCATIONS

Anurag University	Aug 2023 - Present
<i>B.Tech in Computer Science</i>	
- CGPA: 9+ - Class Representative	

AWARDS & ACHIEVEMENTS

Amazon ML Challenge	Oct 2025
<i>Amazon</i>	
Ranked 1050 / 82,794 (Top 1.3%) for machine learning model accuracy.	
Suntek DSA Elite 25	Sep 2025
<i>Suntek Corp</i>	
Selected as a Top 25 student out of peer group for excellence in Data Structures and Algorithms.	
Google Maps Nominee	Sep 2025
<i>Google Maps Platform</i>	
Shortlisted as an official nominee for the Google Maps Platform Challenge for 'Urban Ally'.	
Third Place Finish - CSI AVENSIS 2K25	May 2025
<i>Anurag University</i>	
Led team to a third place finish at the CSI AVENSIS 2K25 by developing an AI Model for Online Customer Review Analysis using Python, Streamlit, and fastText.	

DSA PROFICIENCY

- Completed **450 problems** on LeetCode, achieving a global ranking of **224,015**.
- Solving approximately **760 problems** on CodeChef.
- Worked on around **50 problems** in GFG.
