SKILLS

Languages : C, C++, Java, Python, JavaScript

Web Technologies : React.js, Node.js, Express.js, HTML, CSS

Databases : MongoDB, SQL (Basics)

Core CS : Data Structures & Algorithms, OOP, DBMS, OS

Tools : Git, GitHub, VS Code, Postman

PROJECTS

Expense Analytics System (MERN Stack)

- Developed a full-stack expense tracking and analytics platform using MongoDB, Express.js, React, and Node.js
- Designed RESTful APIs for users, categories, expenses, and analytics with modular backend architecture
- Implemented JWT-based authentication with HttpOnly cookie-based session handling for secure user sessions
- Enabled categorized expense tracking with monthly and yearly summaries through analytical dashboards
- Structured the backend for scalability and maintainability using organized models, controllers, and routes

Role-Based Blog Website (MERN Stack)

- Built a full-stack blogging platform supporting three user roles: Reader, Author, and Admin
- Implemented role-based access control and protected API routes using backend authorization middleware
- Enabled authors to create, edit, and manage posts while admins manage users and platform content
- Designed MongoDB schemas for users, posts, comments, and permissions to support scalable content management

ACHIEVEMENTS

Winner : Vogue AI Challenge, GDSC (Google Developer Student Club); built an AI prompt optimization model focused on accuracy and output integrity

LeetCode : Contest Rating: 1365; solved 240+ Data Structures & Algorithms problems

EDUCATION

Anurag University

Expected 2027

B.Tech in Computer Science Engineering

- **CGPA**: 8.56
- **Problem Solving**: Solved 240+ problems on LeetCode (Data Structures & Algorithms)
- **Core Coursework**: DSA, OOP, DBMS, Operating Systems, Computer Networks
